 Subject: East St. Charles Road Sidewalk Improvement Project
 Construction Contract

Attached are the resolution and contract for construction of the East St. Charles Road Sidewalk Improvement Project. This work is from Craig Street to Grace Street.

Background

This work is an extension of the Downtown Sidewalk Improvement Project and is a project included within the Village's current Capital Improvement Program. The project is funded through the Village's TIF 1 West Fund. The project design began concurrently with the previous phases of the Downtown Sidewalk Project and will start construction in the fall of 2024.

The Village installed the existing brick paver sidewalks, tree vaults, and streetscape elements throughout the downtown in 1995. The downtown area has approximately 35,000 square feet of brick paver surface. Due to tree growth and base failures, walking surface areas are heaved and uneven. The current condition of the sidewalks creates a liability to the Village. The sidewalk project area is the St. Charles Road corridor from Elizabeth Street east to Craig Place.

Award

The Village solicited a proposal from R.W. Dunteman Co., who constructed the previous phases of the Downtown Sidewalk Project Improvement. Additionally, the contractor will be performing the work for the St. Charles Road Resurfacing Project, which is adjacent to the subject project. There is value to the Village by having this contractor perform the work in terms of efficiency and consistency.

The bid for this work amounts to \$768,979.00. Project financing is through the Village's TIF 1 West. The engineer's estimate for the project was \$760,872.00.

Please present this contract to the President and Board of Trustees at their regular meeting of September 19, 2024. If approved, please return one original signed copy to Public Works-Engineering for further processing.
