January 9, 2020

TO:	Village President and Board of Trustees
THROUGH:	Scott Niehaus, Village Manager
FROM:	Carl Goldsmith, Director of Public Works
SUBJECT:	Police Department Property Restoration

As you are aware, the Lombard Police Department had a minor fire on the morning of January 2, 2020. The fire has been attributed to a commercial shredding machine located in the Records Division. The damage to the facility was largely smoke damage with only minor physical damage to the area. There were no injuries as a result of the fire.

Staff has worked closely with the Village's insurance company to determine the most efficient and costeffective manner to address the restoration of the facility. Several adjusters have toured the facility to inspect it and assist staff in the development of the proper scope of services necessary to ensure a safe working environment for Village personnel. Personnel assigned to the impacted areas of the facility have been relocated and services to the public have been minimally impacted.

In order to expedite the restoration efforts and restore "normalcy" to operations, the Village Manager has executed a contract with Perfection Property Restoration on January 8, 2020. Work commenced on January 9, 2020 and is expected to take two weeks to complete. The Village's Purchasing Manual provides the following:

"D. Emergency Purchases Policy Emergencies are defined as events that could not have been foreseen where immediate action is necessary to safeguard the public's health and safety. In the event of an emergency affecting the public health and safety, the Village Manager or his/her designee may authorize a vendor to perform work necessary to resolve such emergency without formal bid solicitation. Documentation of the emergency and the need for immediate action shall be presented to the Village Board in a reasonable period of time following resolution of the crisis.

An emergency purchase order can be issued authorizing a vendor to perform any and all work necessary only if the public health and safety could be affected. If the purchase exceeds \$25,000, documentation shall be presented to the Village Manager prior to such authorization. The following procedures shall be followed in the event an emergency purchase order is needed:

The Department Head requesting the emergency purchase order shall contact the Assistant Finance Director or his/her designee in order to have the purchase order issued. The Assistant Finance Director or his/her designee will then issue a purchase order to the vendor. Using the purchase order NOTES option, the department shall explain the need for the emergency purchase order and reference the purchase order number that was issued to the vendor. "

This cost will be paid for from the Village's Insurance Reserve Fund. At present, there is \$1,900,000 in the fund for this purpose. In addition, I would note that this is the first incident that has required us to pay a deductible for property damage in the last twenty (20) years. The Village will be reimbursed for expenses related to the restoration that exceed the Village's deductible of \$50,000.

The Village received proposals from four (4) contractors that specialize in property restoration. The proposals are summarized below:

	Belfor Property Restoration	ServPro	ServiceMaster	Perfection Property Restoration
Proposal Cost	\$20,571.24	\$76,703.52	\$93,997.58	\$71,671.12
Responsive to Scope of Services*	No	No	Yes	Yes

* scope of services determined by Village's insurance carrier

Based upon a review of the submitted proposals, the Village staff executed a contract with Perfection Property Restoration in the amount of \$71,671.12. The Village will have additional expenses related to the replacement of the shredder. Staff requests that the Village board of Trustees ratify the contract with Perfection Property Restoration with a waiver of bids.

I respectfully request that this item be placed on the Village Board of Trustees agenda for the January 23, 2020 meeting for ratification per the Village's Purchasing Manual. If you have any questions please do not hesitate to contact me.

Insurance Contract

The contract price shall be stated in the contract documents, which shall consist of: (1) this work authorization; (2) a detailed cost estimate, as approved by the insurance company, and (3) any supplemental cost estimates or change orders.

		Authorization for Direction to Pay
Contract Total	\$71,671.12	Date:01/08/2020
1 st Draw	\$27,600.09	Due: Upon Completion of Mitigation Service
2 nd Draw	\$2,763.68	Due: Upon Completion of Content Cleaning
3rd Draw	\$	Due:
Final Draw	\$41,307.35	Due: Upon Completion of Repairs

- Work will stop if payments are not received per the above schedule

- Contractor shall commence work by:

- Contractor shall complete work by:

Client will be notified immediately of any delays caused by approvals, inspections, permits, or any other circumstances beyond contractor control. Completion date shall be automatically extended by thirty (30 days) each time Owner fails to make any selection within ten (10 days) of request by Contractor or makes any changes to scope of work.

Customer's Right to Cancel

You, the Owner, may cancel this agreement by mailing a written notice to Perfection Property Restoration, Inc. 215 Prairie Lake Road, Unit F, East Dundee IL 60118 before midnight on the earlier of the third business day after you have received written notification from your insurer that all or part of the claim or contract is not a covered loss under the insurance policy or the thirtieth business day after your insurer has received properly executed proof (s) of loss from you. If you wish, you may use this page as that notice by writing "I hereby cancel" and adding your name and address in the space provided, below. A duplicate of this agreement will be provided by the Contractor for your records.

TERMS AND CONDITIONS OF AGREEMENT

In addition to the terms and conditions on the face of this document, it is agreed:

- 1. OFFER AND GOVERNING PROVISIONS. This proposal by Perfection Property Restoration, Inc. or Perfection Cleaning & Restoration Enterprises ("Contractor") to sell the services described herein to the Owner to which this proposal is addressed, is subject to the terms and conditions set forth on the face and reverse sides hereof. This proposal expires 30 days from its date. THESE TERMS AND CONDITIONS CONSTITUTE THE ENTIRE AGREEMENT BETWEEN CONTRACTOR AND OWNER, AND SHALL BE GOVERNED BY AND CONSTRUED ACCORDING TO THE INTERNAL LAWS OF THE STATE OF ILLINOIS.
- 2. <u>COMPLETION, DELAY AND CLAIMS.</u> Contractor shall not be liable for any damage as a result of any delay due to any cause beyond Contractor's complete control, including but not limited to any act of God, act of Owner, embargo or other governmental act, regulation or request, fire, accident, strike, slow-down, war, riot, delay in transportation, delayed delivery by suppliers or in the event of any such delay, the date of completion shall be extended for a period equal to the time lost by reason of the delay. Claims by Owner against Contractor must be made in writing to Contractor within thirty (30) days of knowledge of the alleged claim and failure to give such notice shall constitute unqualified acceptance and a waiver of all such claims by Owner. Contractor reserves the right to perform in installments, unless otherwise expressly stipulated in this proposal; and all such installments, when separately invoiced, shall be paid for when due per invoice, without regard to subsequent performance times. Delay in performance of any installment shall not relieve Owner of its obligations to accept future performance; Contractor may furnish substitutes for products unobtainable because of priorities or regulations established by governmental authority or the non-availability of raw materials, parts or goods from suppliers.
- 3. PRICE AND PAYMENT. The prices in this proposal are Contractor's prices for goods and/or services with the Exclusion of Consequential Damages and Disclaimer of Other Liabilities, as found in Paragraph 5 below, including the disclaimer of strict liability and other tort liability, enforceable against the Owner. If Owner desires for Contractor to provide a greater or additional warranty and/or to be liable for some of all of the matters disclaimed in Paragraph 5, then the Owner must notify Contractor in writing and a new contract will be prepared which excludes this language, but which reflects higher sales prices reasonably compensating Contractor for assuming that additional exposure. In the absence of such notification, by signing this proposal, Owner is accepting such limitations and disclaimers in exchange for the lower prices set forth herein.

OWNER AGREES TO PAY ALL COSTS OF COLLECTION, INCLUDING REASONABLE ATTORNEY FEES. ALL INVOICES ARE CONSIDERED PAST DUE 15 DAYS AFTER THE DATE ON THE INVOICE, INTEREST CHARGES SHALL BE ASSESSED ON ALL PAST DUE BALANCES AT THE RATE OF 1% PER MONTH.

- 4. WISCONSIN LIEN LAW. As required by the Wisconsin construction lien law, claimant hereby notifies owner that persons or companies performing, furnishing, or procuring labor, services, materials, plans, or specifications for the construction on owner's land may have lien rights on owner's land and buildings if not paid. Those entitled to lien rights, in addition to the undersigned claimant, are those who contract directly with the owner or those who give the owner notice within 60 days after they first perform, furnish, or procure labor, services, materials, plans or specifications for the construction. Accordingly, owner probably will receive notices from those who perform, furnish, or procure labor, services, materials, plans, or specifications for the construction, and should give a copy of each notice received to the mortgage lender, if any. Claimant agrees to cooperate with the owner and the owner's lender, if any, to see that all potential lien claimants are duly paid.
- 5. WARRANTY. Owner agreed that this proposal is subject to Contractor's standard (2) year limited warranty. Contractor guarantees all labor for the period of two years from the final date of initial work performed. All material will be covered by the manufacture warranty only.
- 6. <u>CHARGES UPON CANCELLATION</u>. If Owner cancels or terminates this proposal after acceptance and after midnight of the third business day after Owner signed this proposal, then Owner shall pay to Contractor for all work done to date, plus any other actual damages suffered by Contractor.
- 7. <u>SEVERABILITY</u>. If any of the Terms and Conditions shall be deemed illegal and unenforceable, such illegality or unenforceability shall not affect the validity and enforceability of any legal and enforceable provisions hereof which shall be constructed as if such illegal and unenforceable provision or provisions had not been inserted herein, unless such illegality or unenforceability shall destroy the underlying business purpose of these Terms and Conditions.
- 8. <u>CHANGE ORDER.</u> Any changes to these Terms and Conditions must be made in writing and signed by both parties. Owner expressly agrees to pay for any changes at the time of the execution of the change order.
- PRE-EXISTING DEFICIENCIES. The repairs or replacements authorized herein do not cover pre-existing problems or deficiencies unless specifically agreed to in writing by the Owner and the Contractor.
- 10. <u>MATERIALS</u>. All materials shall be standard building materials installed in accordance with standard building practices. Contractor cannot guarantee that the color or materials will match existing colors or materials due to variances in manufactured lots over different periods of time.
- 11. DISCLOSURES. All cost estimates are exactly that: ESTIMATES. The estimate may or may not represent the actual cost of any item. Contractor may seek discounts from its suppliers and subcontractors, and whether or not any discounts are obtained the contract price shall remain the same.
- 12. <u>VENUE.</u> All claims or disputes between the parties shall be brought and litigated in Stephenson or Cook County, Illinois and the parties agree that the State of Illinois Courts are Courts of competent jurisdiction. If Federal courts are used, then all claims and disputes shall be brought in the Illinois Northern District Court Circuit 07 Rockford, IL 61107

Thank you for contacting Perfection Property Restoration (a Interstate Restoration Company) for your property damage needs. We are pleased to provide this estimate to you for the services needed to your property based on our inspection, as well as information provided due to the extent of damages from this loss. If you have any questions, please contact our offices.

This is estimate is not based on prevailing wage, and if the project does fall under the Davis Bacon Act or Federal Wage Act, the labor pricing will increase.

Cert. Proposal for Adam @ Perfection Restoration

for work to be done at Lombard Police Station 235 E Wilson Ave Lombard IL

Thank you for the opportunity to bid your project. Every component for this project has been separately inventoried using our proprietary data system. This proposal contains highly accurate information about your project in three (3) separate sections and concludes with a final price for performing the services indicated. The first section supplies gross totals of each mechanical component to be serviced. The second section identifies the exact task to be performed for each component. The third section describes in narrative format, each component and what tasks we will perform during servicing. This Eco Airducts proposal integrates standards and guidelines from the National Air Duct Cleaners Association (NADCA), the Environmental Protection Agency (EPA) and the Indoor Air Quality Association (IAQA). A senior project manager holding both a Certified Air Duct Cleaning Specialist and a Certified Indoor Environmentalist designation conducts project oversight.

The following are the total amounts of each duct system component type to be serviced: 3 Roof Top Units and all connecting duct work to include the following.

Mechanically Clean (3 Rtu's) Units to Include

- Type 2 (wet) Cleaning on Blower and Coil in Main Unit
- Remove exterior panels and vacuum interior components with HEPA filtered Contact Vacuum.
- Remove and Replace all air filters on Unit# 1, 2 and 3
- Encapsulate Panels with IAQ8000 to seal bad odor

Mechanically Clean and Disinfect all connecting supply duct work to include

- Make necessary access openings on all trunk lines
- Clean all sheet metal ductwork with rotary brush system and high pressure air tools.
- Vacuum interior lined duct work with HEPA filtered contact vacuum to remove any soot contamination.
- Encapsulate all interior lined and sheet metal duct work with IAQ8000 to seal any soot contamination.
- Clean and disinfect all duct branches with HEPA Filtered Collection Unit
- Remove and Replace12" 10" and 8" flex ductwork due to soot contamination as needed

Detach, Clean and Disinfect and reattach all Supply and Return Diffusers throughout entire facility

Duct System Component and Task Specifications

Air Handler Unit(s) (5 to 15 Ton Range)

This classification indicates that the AHU (air handling unit) is part of a split system. The 5 to 15 ton range is utilized to identify the physical size of the equipment to be cleaned rather than the capacity of cooling or heating. Most systems in this size range allow entry into the unit by our workers. The EPA and NADCA standards require that all internal components be cleaned. Air handling units that fall into this range are designed for commercial applications. These units are generally located within the facility's mechanical room (vertical application) or hung above the ceiling space (horizontal application). Air handlers have been identified by the EPA as a microbiological growth site. Strict protocol is followed when cleaning this component to prevent cross contamination.

Cleaning Of Components

System is shut down and locked out during the cleaning process. All internal components including the evaporator coil, drain pan, blower wheel and housing, heating components and fiberglass liner are HEPA vacuumed with contact vacuums rated at 99.97% arrestance to .3 microns. Hydro-remediation is employed for evaporator coils, blower components and drain pans utilizing an alkali foaming coil cleaner. EPA recommendations are followed for unit cleaning. A minimum of three complete applications of foaming coil cleaner is used to loosen impacted particulate. Note: Not all evaporator coils can be completely cleaned. However, Eco Airducts uses best-effort practices.

Supply Diffuser

A diffuser is the register or grille-like facing attached to the branch run through a connector called the duct system boot. All diffusers, grilles and registers are first-line indicators of either dirty mechanical systems or free-floating debris in the room air. Many employee complaints originate from this condition.

Cleaning Of Components

The diffuser grille is removed from the boot attachment. The exposed boot is contact HEPA vacuumed, then prepared to control cross contamination. The cleaning is conducted with high-efficiency negative air machines that filter 99.97% of particles down to .3 microns to prevent cross-contamination and capture particulate. Diffusers are transported to central cleaning stations. A mild mixture of alkali cleaning solution is applied to diffusers followed by hand brushing and rinsing thoroughly with water.

Installation Of Access Plates

Closures are made using metal galvanized insulated or non-insulated plates. The plates are fabricated of a gauge (thickness) metal that is equal to or greater than the gauge it is applied to. Plates are sized 1" larger than the access opening and secured with self-tapping screws. Foil metallic tape (not duct tape) is then applied over the seam. Mastic is applied to the tape, plate and duct, further strengthening the closure. These closures are designed to be permanent. This procedure allows the system to be re-energized at the end of the work cycle without air leakage occurring. This closure method requires additional labor and materials. Therefore, bid differences may be reflected here.

Interior Lined Metal Duct

This type of duct is defined by its utilization of a fiberglass duct liner, which is installed on the inside of the duct system. The internal liner must be cleaned using industry accepted "non-aggressive" techniques so as not to dislodge or erode the fibers.

Cleaning Of Components

Ducts are accessed through existing service openings or fabricated openings created by Eco Airducts. These openings allow maximum closure strength and preserve the structural integrity of the duct system. HEPA-filtered contact vacuuming is used extensively to insure that the compressed fiberglass matrix has been cleaned to the deepest level possible. The cleaning is conducted with high-efficiency negative air machines that filter 99.97% of particles down to .3 microns to prevent cross-contamination and capture particulate. National standards are strictly adhered to. Rotating brushes and air whip tools are utilized only when coatings or resurfacing products are applied since these tools can damage ductboard duct systems. Ductwork is resealed using a proprietary method that exceeds all current closure standards.

Externally Insulated Metal Duct

This type of duct is defined by its utilization of a fiberglass duct insulation that is installed on the outside of the duct system. The external insulation must be penetrated to allow access to the metal duct. The ducts should be accessed and closed using industry-accepted standards while adhering to or exceeding local codes. The integrity of the outer insulation's vapor barrier is critical in assuring that moisture will not condense on the cold duct's outer surface. The outer insulation is also critical in retaining energy during the heating season.

Safety

Eco Airducts is trained in lock-out/tag-out, MSDS, hazardous communications, safety, respirators, ladders, and other jobrelated issues. Eco Airducts safety program manual is available to you upon request. Medical logs detailing each crew person's health and respiratory physical exam history is also available. We recommend pre-informing all building occupants when remediation will occur. Odor problems within a facility cannot always be eliminated. However, they are generally reduced when the HVAC unit or duct system is the cause. Security systems and/or protocols may be altered while performing our service. When alternative systems are needed due to these criteria, it will be the owners, owner's representative or contracting agent's responsibility to coordinate.

Indemnity

CLIENT agrees that CONTRACTOR is not a generator of contamination, pollutants, toxins and hazardous substances. The CLIENT also agrees that there is no warranty or guarantee by CONTRACTOR either expressed or implied that the air conditioning system(s), air, water (potable, ground/surface), soil, building, interior furnishings (including plants) and process equipment, is free from all toxins, contaminates (including biological growth), or hazardous materials and substances that have been determined by proper authorities are detrimental to the safety or health and welfare of human and animal populations and the environment

Client Responsibility

CLIENT shall provide access to building interior & HVAC equipment during normal working hours, or hours as agreed by the CLIENT.

Change Orders

It is highly recommended that substantial deviations from the original, agreed-upon scope of work, time frame, price or method of payment, or other substantive provision of the contract, be documented in a written change order that details the deviation. Further, it is recommended that the client or the client's legal agent, and the remediators representative accept the change order in writing.

Confidentiality

Eco Airducts agrees to retain all non-public information obtained from Client as confidential and agrees not to release or discuss any of such information unless we have received prior consent of Client or is otherwise forced, compelled, or required to disclose this information by operation of law or applicable government authority.

This job will be conducted during regular Regular business hours.

The Price to perform the stated work is Sales Tax	\$ \$	13,665.00 0.00
