

## Interoffice Memo

**To:** Transportation and Safety Committee  
**From:** Michael D. Millette, P.E., Civil Engineer II  
**Date:** October 1, 2002  
**Subject:** Main Street (Roosevelt to Edward)

---

At the last committee meeting a technical memorandum from Civiltech Engineering was distributed relative to the traffic flow problem adjacent to the Lombard Pines Shopping Center.

Civiltech was directed to make an independent study of the problem and offer a proposed solution without any bias from staff. Their conclusion confirmed staff's opinion that dedicated turn lanes are required. As the memo indicates, this can be accomplished without purchasing any right-of-way, through the use of temporary construction easements.

The Engineering Division will be submitting an application for Federal funding for this project to the DuPage Mayor's and Manager's Conference this year. A preliminary estimate of construction cost is \$888,620.
