With the implementation 8 years ago of the Asset Management System, decision making has been greatly improved. Data regarding the condition of streets and utilities, coming from our pavement ratings inventory and the resulting OCI reports, have been used again this year in aiding of the selection of streets to be resurfaced. The estimated cost of the recommended improvements for the asphalt program is \$1,567,151.00.

A determination of roadways to be paved by the Contractor and those paved by Village staff will be made prior to the bid.

The targeted letting date for this project is May 8, 2026. Please provide a recommendation at your earliest convenience so that plans can be finalized and advertised for bid.
