

August 5, 2013

TO: Public Works Committee

THROUGH: David A. Hulseberg, Village Manager

FROM: Carl S. Goldsmith, Director of Public Works *G*

SUBJECT: **Second Draft: FY 2014-FY 2023 Capital Improvement Program**

Attached is the second draft of the Capital Improvement Program for Fiscal Years 2014 – 2023. The second draft of the FY 2014 - FY 2023 Capital Improvement Program is proposed at \$137,829,850. A total of \$118,616,450, in local and \$19,213,400 in non-local funds are projected to be spent for capital improvements during the FY 2014-FY 2023 Capital Improvement Program. For FY 2014, the CIP is funded at \$13,305,400, with \$12,156,500 in local funds (Capital Projects Fund, Hotel/Motel Tax, TIF funds and Water/Sewer Capital Reserve Fund) and \$1,148,900, in non-local funds.

Included in the proposed expenditures for FY 2014 of \$13,305,400 are the following expenditures: \$200,000 for Bikeway and Pedestrian Path Improvements, \$712,000 in Commuter Parking Facilities \$1,290,000 for Facility Improvements and Maintenance; \$170,900 for Right-of-Way Maintenance and Beautification; \$2,072,600 for Sewer System/Stormwater Control Improvements not performed in conjunction with a street project; \$105,000 for Sidewalk Improvements; \$5,578,300 for Street Construction and Maintenance (including related underground improvements); \$573,100 for Traffic Signal and Street Lighting Improvements; and \$2,603,500 for Water System Improvements not attributable to a street project.

In addition to the non-home rule sales tax, other revenue sources used to finance capital improvements include a 5% utility/telecommunications tax, the public benefit property tax, motor fuel tax and commuter parking fund revenue.

What follows is the FY 2014–FY 2023 Capital Improvement Program. Revisions and additions will be incorporated in the Third Draft of the Capital Improvement Program based upon the Committee's direction and further Staff review. The projects contained in the Capital Improvement Program for FY 2014 are summarized below and are presented by project category. Any changes from the first draft are denoted by bold text.

Bikeway and Pedestrian Improvements

Train Station Underpass – The construction of a pedestrian underpass at Park Avenue was proposed for FY 2013 by Metra and the Union Pacific Railroad. Due to delays in the bidding process and bids received by Metra that far exceed the \$5,000,000 proposed

budget, the project has been delayed. It is anticipated that the construction will occur in 2014. The Village has included \$200,000 in the FY 2014 CIP to fund the costs of the upgraded tunnel features.

Commuter Parking Facilities

This is a new section in the Village of Lombard's Capital Improvement Plan. The maintenance and improvement projects are funded through the Commuter Parking Fund, which is an Enterprise Fund established for the express purpose of operating and maintaining the commuter facilities. Each commuter facility has been evaluated and a maintenance and depreciation schedule has been established. The routine maintenance (i.e. grind and overlay, curb replacement and stripping) will appear have been programmed as part of the Village's on-going maintenance program in each respective program; however, the funding source is identified as the Commuter Parking Fund.

Hammerschmidt Parking Lot Extension – The FY 2014 CIP contains \$712,000 for the expansion of the Hammerschmidt Commuter Parking Lot along St. Charles Road. The project includes the creation of 110 new parking spaces allocated for residents of the Village of Lombard.

Facility Maintenance and Improvements

North Garfield Site – Maintenance Building – The project includes the construction of a 60' by 40' maintenance building to house equipment and personnel during operations of the salt dome. The maintenance building construction is slated for FY 2014 at a cost of \$550,000.

Parkside Retaining Wall – The Village constructed a retaining wall along the north right-of-way for Parkside during the construction of the commuter parking lots. The Village is responsible for the maintenance of the wall. The Village identified movement of the existing wall and has allocated \$265,000 in the 2014 CIP for the repairs to the soldier pile retaining wall. This project will be funded through the Downtown TIF.

Police Department Surveillance Cameras – This project includes the installation of an enhanced video surveillance system. The system will feature high definition day/night cameras to better serve the department's needs. The FY 2014 CIP contains \$25,000 to complete the upgrades.

Fuel Dispensing Station – The fuel dispensing station used for all Village vehicles and School District #44 is due for replacement in 2014. The current fueling system includes a 10,000 gallon single wall tank for unleaded and a 10,000 gallon single wall tank for diesel. Both tanks were installed in the 1970's and have reached their design life. The current State regulations would require double walled tanks. The dispensing units (pumps) were updated in 2007. Given the location of the existing system, within the storage yard at Public Works, the system is inundated with water

and salt, which has caused problems with the pumps and premature deterioration of components. The project entails relocating the system onto the northeast corner of Hammerschmidt and Central and increasing the unlead tank to 12,000 gallons and adding additional pump handles for diesel. The cost is estimated at \$375,000.

GIS Development Project – This project is a multi-year project funded at \$25,000 annually. The purpose of this project is to update and correct material deficiencies in the Village's mapping system. The information utilized to construct the layers in the system was input by an outside firm and lacks the precision necessary to ensure usefulness of the data.

General Facility Maintenance – The funding of this project is set at \$50,000 annually and is used for the maintenance of the Village facilities, not attributable to a specific project.

Right of Way Maintenance and Beautification

Right-of-Way Beautification Program – This annual program is designed to improve landscaped areas in the Village to enhance the aesthetic appeal of the Village. The program contains \$65,000 in FY 2014.

Downtown TIF Streetscape Improvements Program – This annual program is designed to improve the streetscape elements, brick pavers and other downtown features. The program contains \$25,000 annually.

Parkway Ash Tree Removal and Replacement Program – This program was added to the CIP for FY 2012B. The project is a ten year program designed to remove and replace parkway trees infested with emerald ash borer. FY 2014 contains \$80,900 for the program.

Sewer System/Stormwater Improvements

Clear Water Disconnect Grant Program – In 2012, the Village revised the grant program to incorporate “triggers” for compliance that is tied to Village issued building permits. The Village has amended the policy to include the Overhead Sewer Grant Program as a “trigger” to eliminate clear water from the sanitary/combined sewer system. FY 2014 contains \$75,000 in funds for the grant program.

IL Route 53 Stormwater Pump Station – The original improvements anticipated for the station included the replacement of the existing vertical turbine pumps with submersible pumps and inclusion of a grit chamber to prevent debris from entering that station and interrupting operations. However, as the consultant presented the Preliminary Design Report (PDR), it became clear that this was not the most suitable option. Instead, the Village will be looking to abandon the station, which is constructed in the 100 year floodplain and construct a new station upstream that will ensure proper operation of the station. The new station will increase the capacity to pump stormwater and alleviate

flooding upstream. The cost of the project is estimated at \$5,611,000. The FY 2014 CIP contains \$270,100 for resident engineering, permitting and construction material testing. It is anticipated that construction will be completed in 2016. The Village acquired two parcels in 2012 along Rt. 53 to provide for the relocation of the station.

Lift Station, Rebuild – Fairview – The FY 2014 CIP contains \$160,400 for the design engineering for the reconstruction of the station. The Village has included \$1,410,100 in 2015 for the construction of the station. The Village is in discussions with the Lombard Park District for additional property via an easement to allow for the new station. This project was developed in response to the July 23-24, 2010 storm event.

Pump Station Component Replacement – The FY 2014 CIP contains \$107,100 for the replacement of electrical cabinet and components at stations that have not been replaced as a result of the station modifications following the July 2010 storms. This project will standardize all cabinets to ensure the safety and operational efficiency of the cabinets.

Backyard Sewer Lining Program – This project is a three (3) year project focused on lining the sewers located in the rear yards in Lilac Gardens, Pinebrook and Foxworth. Each year is programmed at \$100,000. FY 2014 represents the second year of the program.

Terrace View Pond – Maintenance & Monitoring - An Intergovernmental Agreement between the Village of Lombard and the Lombard Park District makes the Village responsible for maintenance of Terrace View Pond. As part of the DuPage County Stromwater Permit for the stormwater project constructed in 2013, the Village must inspect and document the establishment of the wetland plantings along the shoreline of the pond for up to five years. The 2014 CIP contains \$10,000 for this function.

Vista Pond West Expansion – The 2014 CIP contains \$500,000 for the expansion of the Vista Pond. The project entails excavating the pond into the existing grassed area immediately west of the existing pond. This action adds 7.2 acre-feet (2,346,130 gallons) of flood storage to lower local flood stages and relieve downstream flow into the combined sewer system.

Philips Court Inflow and Infiltration Study – This study entails the flow monitoring, televising, smoke testing, inspection of the upstream sewer system and checking homes for illegal sump pump connections. The intent of the project is to identify the source(s) of clear water in the sanitary sewer system and appropriately address the source reduction/elimination. This project was originally programmed for 2015, but staff would like to complete this study in advance of the construction of the Rt. 53 Stormwater Pump Station to account for as many variables as possible. The FY2014 CIP contains \$125,000 for the project.

Maintenance Programs - The FY 2014 CIP contains \$30,000 for the Sewer Televising and Cleaning Program, \$75,000 for the Underground Structure Maintenance Program,

\$20,000 for the Backyard Flooding Prevention Program, \$75,000 for the Lift Station Maintenance Program, \$50,000 for Overhead Sewer Grant Program, \$200,000 for Sewer Maintenance and Improvements Program, \$75,000 for the Sanitary Sewer Lining Program, \$75,000 for the Catch Basin Cleaning Program, \$50,000 for the Sewer Stub Lining Program and \$75,000 for the Large Sewer Flushing Program.

Sidewalk Improvements

Trip Hazard Replacement Program – This annual program is set up to repair and replace existing sidewalks determined to be a trip hazard pursuant to Village policies. **The program is funded at \$85,000 annually.**

Deteriorated Sidewalk Program – This program established under Village Board policy provides a 50% cost share to residents for the replacement of damaged/deteriorated sidewalks. **The cost of the program is \$20,000 annually.**

Street Construction and Improvements

Pavement Marking Replacement Program – This maintenance program has been added to the FY 2014 CIP as a result of discussions with the Public Works Committee. The funding of the program will be used to maintain and refresh pavement markings in accordance with the Federal Manual for Uniform Traffic Control Devices (MUTCD). The restriping of Village commuter parking lots are also included in this program and are funded by Parking Capital Reserve Fund. The 2014 CIP contains \$50,000 for the program.

Madison Street (Grace to Westmore) – The Village will replace panels as necessary and diamond grind the project area to improve rideability across the joints. It is anticipated that the improvement will take place in FY 2014 at a cost of \$350,000.

Lombard Meadows 1: Chase Lane & Court – FY 2014 contains \$1,958,900 for the reconstruction of existing roadway (including curb and gutter and storm sewer) to the current Village standard (full depth asphalt pavement). The scope of work includes replacement of the water and sanitary sewer mainline and services. Replacement of the lighting system is also included. The existing streets are 3 inches plus or minus of asphalt on a stone base, and received a grind and overlay approximately 20 years ago.

Circle Avenue Reconstruct Project – The FY 2014 CIP contains \$136,100 for the geotechnical and design engineering for the project, which includes the replacement of the sanitary sewer and watermain and the reconstruction of the street. Construction activity is anticipated in 2015.

Lombard Meadows 2: Lodge Lane & Lilac Lane – FY 2014 contains \$240,500 for the geotechnical and design engineering in advance of the reconstruction of existing roadway (including curb and gutter and storm sewer) to the current Village standard (full depth

asphalt pavement), which is anticipated in 2015 at a cost of \$2,865,200. The scope of work includes replacement of the water and sanitary sewer mainline and services. Replacement of the lighting system is also included. The existing streets are 3 inches plus or minus of asphalt on a stone base, and received a grind and overlay approximately 20 years ago.

Maintenance Programs - The FY 2014 CIP contains \$539,500 for the General Local Street Resurfacing Program, \$327,000 for the Local Street Resurfacing with Village Crews and \$50,000 for the Curb Replacement Program, \$495,300 for the Full-Depth Asphalt Patching Program, \$146,000 for Crack Sealing, \$820,000 for General Concrete Street Rehabilitation Program, \$100,000 for the Concrete Utility Patching, \$70,000 for the Surface Treatment Program, \$140,000 for Parkway Restoration and \$125,000 for the Asphalt Utility Patching. The specific locations for these projects have not been identified, but will be based upon the Pavement Management Study.

Traffic Signal and Street Lighting Improvements

Street Light Pole Replacement – This project provides \$50,000 for the maintenance and replacement of street light poles and traffic signals not included in a specific project. The Village utilizes these funds to inspect the traffic signal poles.

Traffic Signal & Intersection (Madison & Route 53) – This project consists of roadway improvements to the intersection, as well as the installation of a traffic signal. This project is a joint effort between the Village of Lombard, IDOT and York Township. The Village has programmed \$311,600 in FY 2014 for the design engineering. Construction is anticipated in FY 2015 at a cost of \$3,760,100.

Railroad Crossing at Elizabeth Street – The project intent is to upgrade the crossing gates at Elizabeth Street to a quad gate system. The Village is working with the ICC and Union Pacific to improve public safety. The Village's cost of the project covers the engineering and is set at \$111,500 in FY 2014 and \$455,000 in FY 2015, which will be funded through the Illinois Commerce Commission.

Traffic Signal Pole Replacement – The FY 2014 CIP contains \$100,000 to replace ten (10) deteriorated traffic signal mast arms and poles. Nine (9) poles are located on Westmore/Meyers Road and one (1) is located on Main Street. Additionally, the funding will cover the costs to upgrade several signal heads to LED.

Water System Improvements

Watermain Maintenance & Improvements Program - The FY 2014 CIP contains \$150,000 for the Watermain Maintenance and Improvement Programs not associated with a standalone project.

Eisenhower Lane Reservoir Facility – This proposed Eisenhower Lane potable water storage facility is required to accommodate water demands on the south side of Lombard. A single pedestal elevated tank is proposed. The Village will be conducting a network analysis to determine capacity and other design parameters in advance of the FY 2014 CIP. The FY 2014 contains \$57,500 for geotechnical engineering. As a result of the Water Network Analysis, the staff and consultant recommend removal of this project from the CIP.

Roosevelt Road Watermain Replacement Phase I – The Village has experienced significant break history along Roosevelt Road between Finley Road and Wisconsin Avenue. The Village has developed a project to perform cured in place lining of significant portions of the existing watermain network in the corridor. The project has been split into two phases. Phase I is the western limits of the Village to Fairfield. Due to complications relative to permitting through the IEPA, this project has been reprogrammed to 2015 construction.

Transmission Main (Civic Center to South Booster) - Based upon the results of the Water System Network Analysis, this project has been advanced from 2017 construction to 2014 construction. The project includes the construction of a 16" ductile iron water transmission main between the Civic Center and the South Booster Station. The cost of the project is estimated at \$2,003,500.

Civic Center Reservoir Facility - Generator – This project includes the replacement of the existing generator and underground fuel tank with an above-ground unit. The cost of the project is estimated at \$450,000.

Closing Comments

I would like to commend the Public Works Department for their commitment to the capital planning process. The projects developed through the diligent effort of the Village Board, Public Works Committee and village staff shows a commitment to maintaining the Village's infrastructure at a high level. The continued focus on stormwater and drainage should prove to be a wise investment on the part of the Village, along with the approach of addressing underground utilities in conjunction with roadway reconstructs.

Staff has attached several CIP summary documents that have been used to develop the FY 2014 – FY 2023 Capital Improvement Plan. Staff will be in attendance at the August 13, 2013 Public Works Committee meeting to discuss the second draft of the proposed FY 2014 – FY 2023 Capital Improvement Plan.
